PROFESSIONAL SUMMARY

Motivated B.Tech Information Technology student with a strong academic record and hands-on experience in Machine Learning, Deep Learning, and Python-based application development. Skilled in developing end-to-end AI solutions using Python, TensorFlow, Scikit-learn, Streamlit, and data analysis libraries. Experienced in building practical projects involving AI-powered agriculture, infrastructure damage detection, predictive analytics, and sustainability. Passionate about solving real-world problems through innovative AI/ML solutions and continuously expanding expertise in Data Science and Artificial Intelligence.

EDUCATION

Bachelor of Technology — Information Technology, Silver Oak University, Ahmedabad | 2023 – Present (Expected 2027)

Higher Secondary Certificate (HSC) — 12th | 74.66%

Secondary School Certificate (SSC) — 10th | 85.33%

SKILLS

Programming Languages: Python, C Fundamentals

Python Libraries: NumPy, Pandas, Matplotlib, Seaborn

Machine Learning: Scikit-learn, Supervised Algorithm, Unsupervised Algorithm

Deep Learning & AI: TensorFlow, Keras, ANN, CNN, RNN, LSTM, GRU, Basics of Deep Learning concepts

Web Development: HTML, CSS, Basic JavaScript, Streamlit

Tools & Platforms: Git, GitHub

PROJECTS

VisionGuard AI — AI-Powered Infrastructure Damage Detection

Python · CNN · TensorFlow · Streamlit

- Developed a CNN-based Computer Vision system to classify infrastructure and public environment issues from images.
- Implemented detection for potholes, damaged roads, broken road signs, illegal parking, and other infrastructure-related issues.
- Integrated confidence-based prediction and severity analysis to categorize detected issues as High, Medium, or Low severity.
- Built an interactive Streamlit application with AI-generated inspection reports for practical infrastructure assessment.

EcoTrack — Carbon Footprint Calculator

Python · Streamlit · Data Visualization

- Developed an interactive application to calculate and analyze individual carbon footprints.
- Implemented data-driven calculations and visualizations to help users understand their environmental impact.
